DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 6 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobrehel (US Patent 5,927,020).

Kobrehel discloses a door trim structure for automobiles, the door trim structure comprising: a door trim (12) and an inner door panel (Fig. 4) both made of a thermoplastic resin (column 7, lines 11-17), the inner door panel and the door trim (12) are formed into an integral one-piece unit by a blow molding process (column 7, lines 11-17), wherein the inner door panel includes a functional member attachment portion (22) integral with the inner door panel (column 5, lines 34-35), and wherein the functional member attachment portions (22) includes a recess or a protrusion (22) as a part of an inner wall of the door trim structure such that the functional member attachment portion (22) is formed by the blow-molding process forming the inner door panel and the door trim into the integral one-piece unit (column 6, lines 18-22).

Regarding claim 6, Kobrehel discloses door trim structure for automobiles as claimed in claim 1, wherein the thermoplastic resin is a polypropylene resin (column 7, line 17).

Application/Control Number: 09/786,369

Art Unit: 3612

Regarding claim 11, Kobrehel discloses a door trim structure for automobiles as claimed in claim 1, wherein the functional member attachment portion (22,30) includes recesses (30) and protrusions (22).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 5. Claims 3-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobrehel in view of Grimes (US Patent 5,040,335).

Kobrehel discloses a door trim structure for automobiles as claimed in claim 1.

Kobrehel does not disclose that the inner door panel also acts as a shock absorber.

Application/Control Number: 09/786,369

Art Unit: 3612

Grimes discloses a door trim structure which also acts as a shock absorber, wherein the inner door panel includes a plurality of recesses on its surface (28,30) wherein the recessed inner door panel is sealed with the door trim.

Kobrehel and Grimes are analogous art because they are from the same field of endeavor, i.e., door inner panels with door trims.

At the time of the invention, it would have been obvious to one of ordinary skill in the art to make the inner door panel of Kobrehel a shock absorbing member which includes recesses in the inner panel as taught by Grimes.

The motivation would have been provide shock absorption in the inner door panel to protect the passenger in an accident.

Therefore, it would have been obvious to combine Grimes with Kobrehel to obtain the invention as specified in claims 3-5.

Regarding claim 7, Kobrehel does not disclose what the melt index of the polypropylene resin is. However, the melt index would have been an obvious mechanical expedient. The polypropylene resin would have been selected by one of ordinary skill in the art to meet all of the engineering requirements, such as strength and compatibility with the blow molding machine.

Response to Arguments

6. Applicant's arguments filed March 7, 2003 have been fully considered but they are not persuasive. The applicant argues that the functional attachment portions are not integrally formed as a one-piece unit with the inner door panel and the door trim by means of a blow molding process. However, Kobrehel discloses in column 5, lines 34-

Page 5

Application/Control Number: 09/786,369

Art Unit: 3612

35 that the rigid fasteners 22 are embedded in the plastic material of the door cavity insert and in column 6, lines 18-22 that "the door cavity insert 12 is formed as a unitary molded plastic structure with unitary mounting means for various functional componentery." And then in column 7, lines 4-13, Kobrehel discloses that the hollow embodiment also includes unitary mounting means (similar to the embodiment of Fig. 3) and can be formed by blow-molding.

In the Preliminary Amendment the Applicant states that they filed drawing corrections, however they drawing correction was not with the Preliminary amendment.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L Engle whose telephone number is (703) 306-5777. The examiner can normally be reached on Monday - Friday from 8:00 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, D. Glenn Dayoan can be reached on (703) 308-3102. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-7687 for regular communications and (703) 305-7687 for After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
